EDUCATION

Mar. 2025 – Feb. 2029

Seoul National University, Seoul, S.Korea

B.S. in Computer Science & Engineering

Minor in Statistics (from Sep. 2026)

College of Liberal Studies

RESEARCH INTERESTS

Broadly interested in artificial intelligence and machine learning research.

PROJECTS

Sep. 2025 – present

Simply5x5 — iOS Workout Tracker

SwiftUI · Firebase AI Logic (Gemini) · HealthKit · Swift Charts

- Released an ad-free 5x5 workout tracker on the App Store with auto progression/deload, AI feedback, e1RM strength ranking, and a plate calculator.
- Reached 1.15K downloads, 7.92K app sessions, and 76 average daily active users over the last 30 days as of Jun. 2026; selected for the 2026-1 Computer Programming Extra Project showcase.

2024

Evening Self-Study Request System

Node.js · Swift (iPad) · MySQL

- Collaborated with a peer (responsible for app UI design) to digitize the paper-based evening self-study movement request process at a high school.
- Developed the backend and chose Swift/iPad as the client platform because the school provided iPads to all students at no cost, ensuring universal access without requiring personal devices.
- Completed a pilot; full deployment was deferred due to institutional data-protection requirements for student personal records.

2023

Green City Planner — High School Research Program

visionOS

- Built a visionOS application for interactive 3D urban design, aimed at streamlining environmental impact assessments.
- Collaborated with a peer (responsible for overall UI); led all technical aspects including asset preparation, scene layout, and environmental scoring.

Optimal Transit Route Distribution via Machine Learning

R · Logistic Regression

- Explored correlations between municipal indicators (population, income, bus stops) and tram/subway route placement in Daejeon; built a logistic regression model to predict optimal station distribution.
- Led all technical aspects: data collection, preprocessing, visualization, and model training.

RELEVANT COURSEWORK

Statistics (A⁺), Statistics Lab. (A⁺), Discrete Mathematics, Computing Core: Data-Centered AI, Computer Programming (A⁺), Logic Design (A⁺)

HONORS & AWARDS

Shilla Cultural Scholarship Foundation — Merit-based full tuition for 3 years (Mar. 2026).
SNU Merit-Based Scholarship — KRW 1,199,200, Seoul National University (Feb. 2026).
SNU Development Fund Scholarship — KRW 2,442,000, Seoul National University (Aug. 2025).
Gwanak-gu Mayor’s Commendation — Awarded for service as an outstanding mentor in SAM (SNU Active Mentoring) (Aug. 2025).

SKILLS

Programming	Python, C, C++, Java, Swift, R
Tools	Git, Linux; PyTorch, SwiftUI, Firebase, HealthKit
Languages	Korean (Native), English (Fluent — TEPS 444)

TEACHING

Mar. – Jun. 2026	Undergraduate Mentor Freshman Seminar: “A Journey to Safe Research”, Seoul National University • Supervised class activities and provided individual academic guidance for first-year students. • Facilitated discussions on laboratory safety protocols and collaborative research practices.
------------------	--

EXTRACURRICULAR

Jul. – Aug. 2025	Student Mentor SAM (SNU Active Mentoring), College of Education Mentored local middle school students in Mathematics and Science; developed individualized study plans and facilitated goal-setting sessions.
