Updated: October 2, 2026

EDUCATION

Mar. 2025 – Feb. 2029 **Seoul National University**, Seoul, South Korea
B.S. in Computer Science & Engineering (expected Feb. 2029)
College of Liberal Studies

RESEARCH INTERESTS

Broadly interested in machine learning and artificial intelligence.

EXPERIENCE

Sep. 2026 – present **AI Intern**, IntelliSys, Seoul, South Korea

- Developing SR&D Chat (working title), a prototype retrieval-augmented generation (RAG) assistant to help SNU staff, faculty, and researchers find and verify guidance in Korean R&D regulations.
- Built document-processing and search workflows to retrieve cross-referenced articles and appendices, account for regulation versions, and link answers to source documents.
- Created an evaluation set and review process to measure search relevance and verify answers against source documents.

PROJECTS

Sep. 2025 – present **Simply5x5** — iOS Workout Tracker
SwiftUI · Firebase AI Logic (Gemini) · HealthKit · Swift Charts

- Released an ad-free 5x5 workout tracker on the App Store with automatic progression and deloads, AI feedback, e1RM strength ranking, and a plate calculator.
- Recorded 1.42K downloads and 11.9K app sessions, averaging 67 daily active users over the 30 days ending Aug. 2026; selected for the 2026-1 Computer Programming Extra Project showcase.

2022 **Predicting Tram Route Placement with Logistic Regression**
R · Python (matplotlib) · Logistic Regression

- Modeled whether a proposed tram route would pass through each administrative district in Daejeon using population, income, bus-stop count, and existing subway coverage.
- Led all technical work: collected and cleaned public CSV data, fit logistic regression models in R, examined in-sample predictions using confusion matrices, and used Python with matplotlib on Google Colab for correlation analysis and 3D visualization.

TEACHING EXPERIENCE

Sep. 2026 – present **Teaching Assistant**
Basic Computing: First Adventures in Computing, Seoul National University

- Selected to provide one-on-one support during lectures and programming labs, helping students diagnose errors, debug code, and complete exercises on the Elice coding platform.
- Responsibilities include answering questions through the course chat, providing feedback on final-project proposals and presentations, and proctoring coding assessments.

Mar. – Jun. 2026

Teaching Assistant

Freshman Seminar: “A Journey to Safe Research”, Seoul
National University

Supported seminar activities and guided first-year students
through discussions and collaborative assignments on safe
research practices.

RELEVANT COURSEWORK

Completed: Statistics (A⁺); Statistics Lab. (A⁺); Discrete Mathematics; Computing Core: Data-Centered AI (A⁺);
Computer Programming (A⁺); Logic Design (A⁺).

In progress (Fall 2026): Data Structures; Computer Architecture; Engineering Mathematics 2 (Probability and
Computing); Deep Learning.

HONORS & AWARDS

Shilla Cultural Scholarship Foundation — KRW 17,988,000 over 3 years (Mar. 2026).

SNU Tuition Scholarship — KRW 1,199,200 (Feb. 2026).

Donggok Lee Yong-hee Scholarship — KRW 2,442,000 (Aug. 2025).

Gwanak-gu Mayor’s Commendation — Awarded for service as an outstanding mentor in SAM (SNU Active
Mentoring) (Aug. 2025).

SKILLS

Programming	Python, C, C++, Java, Swift, R
Tools	Git, Linux, PyTorch, NumPy, OpenAI API, PyMuPDF
Languages	Korean (Native), English (Fluent — TEPS 444)
