

[지문 33] 다음 글을 읽고 물음에 답하시오.

Talking about what something smells like is the most basic way of talking about our olfactory* experience, and even this most basic way of talking about smells is ① challenging. There are no words in the English language to describe smells in the same way in which “blue” or “green” describe colors. Instead, to talk about how something smells, we talk about _____. Things smell “flowery,” “fruity,” or “fishy.” Furthermore, even the most ③ unfamiliar odors are difficult to ② identify when they are not experienced in their usual context. In one experiment the majority of participants was ④ unable to name very common odors like beer, urine**, roses, or motor oil. Obviously, even those who couldn’t name any of these odors would drink the beer but not the urine or the motor oil. This is how evolution has ⑤ shaped our brain: We respond to odors correctly in many different ways, but we are not well-equipped to talk about them.

* olfactory: 후각의 ** urine: 소변

1. 다음 빈칸에 들어갈 말로 가장 적절한 것은? [3점]

- ① how pleasant the odor is
- ② how well we can identify it
- ③ what produces the smell
- ④ the emotional reaction it triggers
- ⑤ how familiar the smell is to us

2. 밑줄 친 ①~⑤ 중에서 문맥상 낱말의 쓰임이 적절하지 않은 것은?

- ① ② ③ ④ ⑤

3. [서술형] 윗글의 실험(experiment)에서 발견된 결과를 한 문장(30자 이내)으로 우리말로 쓰시오.

⇒ _____

4. 다음은 윗글을 요약한 것이다. 빈칸 (A), (B)에 들어갈 말로 가장 적절한 것은?

Although humans can respond to odors (A) _____ in practical situations, they often have difficulty (B) _____ them in language.

- | | (A) | (B) |
|---|-------------|------------|
| ① | correctly | describing |
| ② | randomly | avoiding |
| ③ | emotionally | producing |
| ④ | visually | measuring |
| ⑤ | slowly | preserving |
